

ACCESSORIES AND TOOLS

CUTTING DISCS

SCALLOPED BLADE TYPE

The scalloped blade is suitable for all hose types. It is able to reach a high quality of cutting surface and is the standard on 254 and 300 mm blades.

SLOTTED BLADE TYPE

The slotted blade is recommended for cutting standard and heavy duty hoses. It is ideal for continuous service, as the blade profile has been optimised to maintain a low temperature on the cutting edge. This blade provides an extended operational life of up to 2 times superior to the previous blade, and is the standard on 400 and 520 mm blades. It is optional on diameter 254 mm.

MOTOR BRAKE

The motor brake is a device which stops the disc immediately when the stop button is pushed.

PNEUMATIC BENDING

Available on M 55 CUT and M 75 CUT.

Pneumatic bending facilitates cutting, as the operator does not have to force the hose on the blade. The pneumatic system, activated by a foot switch, offers hands-free operation. This is the same principle for the hydraulic bending on M 90 CUT.
